SALES TREND OVER TIME

Sales performance fluctuates over time, with November 2018 recording the highest sales, indicating seasonal peak in demand

SALES BY REGION

The west region leads in sales with approximately 710.22K, making it the strongest performing region in the market.

TOP 10 CUSTOMERS BY SALES

Sean miller is the top customer, generating approximately 25.05K in total sales, showing strong individual contribution to revenue.

SALES BY SUB-CATEGORY

| Sub_Category | Sum of Sales |
|--------------|--------------|
| PHONES       | 327,782.45   |
| CHAIRS       | 322,822.73   |

| LABELS       | 12,347.73    |
| FASTENERS    | 3,001.96     |

Phones recorded the highest sales across all years, making it the strongest performing sub-category.

DELIVERY PERFORMANCE BY SHIPPING  
MODE

Standard class has the average shipping time at 5.01 days, while same day shipping is the fastest at about 1 hour (0.04 days), showing major differences in delivery speed.

## SUPERSTORE PERFORMANCE SUMMARY

### *SALES PERFORMANCE*

- Sales are driven by both number of orders and order value, because revenue increases when either customers buy more frequently or purchase higher priced items.
- November 2018 had the highest sales (117K), due to a spike in orders (456), showing seasonal demand where customers purchased more during that period.

### *REGION PERFORMANCE*

- The west region performs best (710K in sales, 3140 orders) because it has higher customer activity and stronger demand for products.
- The south region is the weakest (389K in sales, 1598 orders), likely due to lower customer base or lower purchasing frequency.

### *CUSTOMER INSIGHTS*

- Sean miller is the top customer (25K in sales from 15 orders) because he places fewer but high-value orders, meaning he buys expensive products per order.
- William brown has the highest orders (35), but only 6.1K in sales, because he places many low-value purchases.

This shows that sales is driven mostly by order value than order frequency.

### *PRODUCTS INSIGHTS*

- Phones generate the highest sub-category sales (327K ) because they have strong demand, medium-to-high priced, and are frequently purchased.
- Binders are the most ordered (1,492 orders), but have lower revenue (200K) compared to phones (327K), because they are cheap items sold in bulk.

### *AVERAGE ORDER VALUE (AOV)*

- Copiers have the highest AOV followed by machines, tables, chairs, bookcases, and phones because they are expensive products that are usually bought in large value transactions but less frequently.

### *SHIPPING INSIGHTS*

- Standard class is the most used shipping mode and generates the highest sales, but it is slow (5 days). Most customers prefer it because it is the cheapest. Thus it generates sales because it is frequently used.
- Same day delivery is the fastest (1 hour) but least used because it is likely more expensive , and only used for urgent purchases.

### FINAL CONCLUSION

The analysis carried out showed that business performance is driven by both "Order Volume" and "Product Value", with the west region showing the highest sales due to order volume, and products like phones and binders contributing to sales through product value and order volume respectively.

To improve overall performance, the business should focus on strengthening weaker regions , increasing promotion of high value products, and targeting customers with higher spending capacity to maximize revenue growth.
